DETAILED ACTION

Allowable Subject Matter

1. Claims 15-21, 23, 26-35 are allowed.
2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Jiwen Chen on 06/05/2010.

The application has been amended as follows:

Claim 15 (amended)

A method for delivering a short message from a foreign mobile network to a user or application server in a home mobile network, the home and foreign networks operating with non-compatible protocols, the method comprising the steps of:

Art Unit: 2617

an SMSC of the foreign network querying a pseudo HLR in the home network, said pseudo HLR operating with the protocol of the foreign network, to determine a serving MSC;

the pseudo HLR providing to the foreign network SMSC an address of a pseudo MSC in the home network, said pseudo MSC operating with the protocol of the foreign network; the foreign network SMSC routing the message to the pseudo MSC, wherein the pseudo MSC terminates the message delivery attempt by sending an acknowledgement to the foreign network SMSC; and

a mobile network node in the home network performing protocol conversion of the message to an access protocol and routing the message using said access protocol to a receiving node in the home network;

the receiving node is a home network SMSC and the method comprises the further step of the home network SMSC routing the message to a destination user or application server;

the mobile network node operates as a pseudo SMSC adapted to operate with the protocol of the foreign network when communicating with the foreign network and with an access protocol when communicating with elements of the home network, and said pseudo SMSC sends the message to the home network SMSC using the access protocol; and

Art Unit: 2617

the pseudo SMSC, in case of delivery failure due to a temporary condition, performs a retry of sending the message to the receiving node and receives a delivery acknowledgement.

Claim 26 (amended)

A mobile network node adapted to deliver a short message from a foreign mobile network to a user or application server in a home mobile network, the home and foreign networks operating with non-compatible protocols, the mobile network node being adapted to reside in the home network and comprising a pseudo HLR operating with the protocol of the foreign network and a pseudo MSC operating with the protocol of the foreign network, and the mobile network node being adapted to perform the steps of:

the pseudo HLR receiving from an SMSC of the foreign network a query to determine a serving MSC;

the pseudo HLR providing to the foreign network SMSC an address of the pseudo MSC;

the pseudo MSC receiving the message from the foreign network SMSC;

the pseudo MSC terminating the message delivery attempt by sending an acknowledgement to the foreign network SMSC; and

Art Unit: 2617

performing protocol conversion of the message to an access protocol and routing the message using said access protocol to a receiving node in the home network;

the receiving node is an inter-working gateway, and said inter-working gateway routes the message to a home network SMSC and the home network SMSC routes the message to a destination user or application server;

the mobile network node operates as a pseudo SMSC adapted to operate with the protocol of the foreign network when communicating with the foreign network and with an access protocol when communicating with elements of the home network, and said pseudo SMSC sends the message to the inter-working gateway using the access protocol; and

the pseudo SMSC, in case of delivery failure due to a temporary condition, performs a retry of sending the message to the inter-working gateway and receives a delivery acknowledgement.

Claims 24 and 25 are cancelled.

3. The following is an examiner's statement of reasons for allowance:

The best prior art of record does not specifically show the limitations of "the pseudo MSC receiving the message from the foreign network SMSC;

Art Unit: 2617

the pseudo MSC terminating the message delivery attempt by sending an acknowledgement to the foreign network SMSC; and

performing protocol conversion of the message to an access protocol and routing the message using said access protocol to a receiving node in the home network;

the receiving node is an inter-working gateway, and said inter-working gateway routes the message to a home network SMSC and the home network SMSC routes the message to a destination user or application server;

the mobile network node operates as a pseudo SMSC adapted to operate with the protocol of the foreign network when communicating with the foreign network and with an access protocol when communicating with elements of the home network, and said pseudo SMSC sends the message to the inter-working gateway using the access protocol; and

the pseudo SMSC, in case of delivery failure due to a temporary condition, performs a retry of sending the message to the inter-working gateway and receives a delivery acknowledgement”.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
